**Subject:** Reception of K-Lite Signal

Thanks for your note regarding the reception of the KLTG signal in Mancos.

Years ago before there were so many FM signals it was not uncommon to receive notes like yours. In the past four or five years, yours is about the third that I recall.

Thank you for taking your time to write. Please consider this note to attest to the accuracy of your reception.

A handwritten signature in black ink, appearing to read "S. DeWalt", is written diagonally across the page.
