Mr. Maurice W. Nittler
Box 94
Geneva,
Nebraska

June 29, 1954

Dear Mr. Nittler:

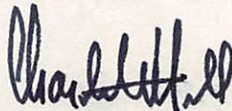

Thank you for your letter of June 26. It was very kind of you to write to us concerning your long distance reception of our television signal.

Recently, we have received many similar reports - from Canada to Cuba - caused in all probability by unusual atmospheric conditions.

WAVE - TV transmits on channel 3 with 100,000 watts power from antenna 914 feet above average terrain.

With kind regards.

Sincerely,

Charles W. Hill
