Re: Letter of Verification

Thank you for taking the time to write down your observations. I only wish you had a Neilson survey at the time. I am sure that you are aware of the inherent positive and negative properties associated with the Ch. 2 signal. A few years ago our signal was coming in so strong in Las Vegas... they published our line-up in the news paper... as a gag.

I don't know for sure what is needed in a letter of verification... however the program content and station breaks you described did occur on the date and times you indicated in your letter. I hope this letter has the information in it... you need.

Thank You

A handwritten signature in black ink, appearing to read "T. Harvey". The signature is written in a cursive style with a large, looping "H" and "y".
