Mr. John Sampson
20088 Las Ondas Court
Cupertino, Calif.

Dear Mr. Sampson:

Many thanks for your reception report on Radio KA-HI, Auburn, California, for October 4, 1966.

The items you report monitoring from 4:27 PM to 4:46 PM, PDT, are substantially correct.

Incidentally, it's good to know that we have poor signal strength in your area. As you may know, Radio KA-HI is a directional radio station and the weak side of our signal lies in your direction - so it's predictably poor. As a matter of fact, it worries our technical people to know that we can be received at all in Cupertino - and they are now in the process of checking our directional transmission equipment and FCC monitoring points.

Again, thank you for writing to us. If you ever visit the Auburn area, please drop in for a visit to Radio KA-HI.

Cordially,

Gene Ragle
