Cupertino, Calif. 95014

Dear Sir:

We are pleased to verify your report of reception of KALI from 4:22 to 4:28 am on March 6, 1967.

That particular test was conducted on our day pattern. Ordinarily you probably would have difficulty receiving us as we operate on our night pattern (which protects KARM) until 5:00 am local time.

We have received a report from Campbell, Calif., the only report from that area besides yours. We do occasionally receive reports from New Zealand. Our main lobe is aimed in that direction at night, and they have a very active DX club down there.

We wish you continued success with your interesting hobby.

Sincerely,

Ted Shireman
