Mr. John Sampson
20088 Gasondas Ct.
Cupertino, California

Dear Mr. Sampson;

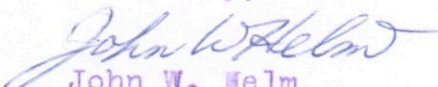

I was very happy to receive your report on the reception of K A S K on Monday morning November 28, 1966. I would like to confirm the reception between the time of 1:17 to 1:33 AM P.S.T.

Your receiver did a fine job of picking us up because we are directional aimed due south. We're one thousand watts fulltime on 1510 kc as you know.

We still have made no definite plans to go 24 hours, but the possibilities are very good. If we decide to give it a try you can probably count on our silent period being Monday morning from 12 midnight to 5 AM.

Thank you again for your detailed report.

Sincerely,

John W. Helm
