

KBEE

MODESTO, CALIFORNIA

Feb 21-67

Dear Mr Sampson,

The station you heard Feb 10-67 was KBEE AM 970 Kcs at I KW dirctional antenna.

We also operate KBEE FM 103.3 Mcs 10.5 ERP nondirectional during the same hours as our AM.

The reason you got some QRM from KABL is their 960 Kcs location on the dial. KABL is one of the stations we have to protect with our dirctional Day-Night pattern changing. We do not get to your area at night; however our FM has been reported in the SF area day and night.

Sincerely,

Albert Schneider  
Ch engr
