Cupertino, Calif.

John:

This is in receipt of your letter of reception for KCNO on ~~Nov~~ Sept. 10 of this year.

From the information included, there is no doubt that you did indeed hear KCNO.

I thank you for your report.

KCNO has a single 320' tower, located in a large meadow, which is moist most of the time, thus insuring a good transmitting ground.

We use a Bauer FB5000J transmitter, and have an old Western Electric 443A-1 1000 watt soon to be installed for standby.

We have a GE BC1-A console, from KSFO in SF, and an ITA agc amplifier and Gates limiter. Monitoring equipment is all Gates.

KCNO features SF Giants baseball, as well as other Golden West Net sports. We currently sign on at 5:30 and off at 4:45 PM.

Again, thank you.
