Mr. John Sampson
20088 Los Ondes Court
Cupertino, California 95014

Dear Mr. Sampson:

In answer to your question about our operating frequency, we are still operating normally on 1490 KHZ. However, we were granted a construction permit in October of last year to build a new station at 1270 KHZ with 5 KW daytime and 1 KW two tower directional nighttime. We anticipate our on-the-air date to be approximately March 25th.

Thank you for your letter. We are real pleased to be heard in California and appreciate your reception report.

Very truly yours,

K I M L

Roy A. Mapel,
