Mr. John Sampson
20088 Las Ondas Court
Cupertino, California, 95014

Dear Mr. Sampson:

It is my pleasure to confirm your reception of KSNN on November 7, 1966.

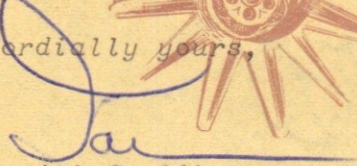

Our signal is non-directional and operating under 1,000 Watts of power.

Our signal is not as strong at this time, as it should be, and you should notice a stronger reception in the very near future. One of our main driving Power Transformers went out, and the substitute replacement has lower our normal efficiency.

In the near future, other changes envisioned should make our early morning reception in your area, exceptionally strong and clear. I would appreciate your observations in the near future, and look forward to your comments.

Thanking you for your time and consideration, believe me to be,

Cordially yours,

Daniel C. Libeg
Pres. & G.n.Mgr.
