Mr. John Sampson
20088 Las Ondas Ct.
Cupertino ,Calif.

Dear John,

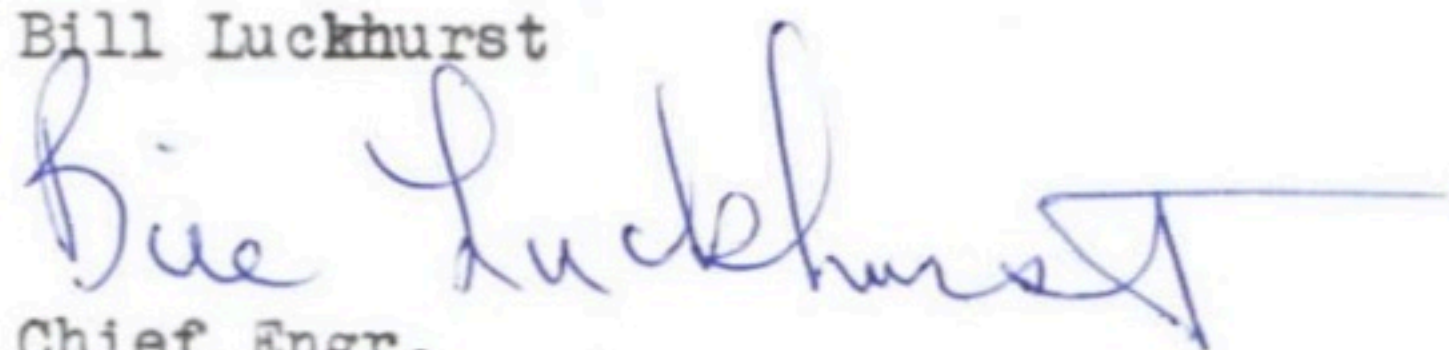

Here is your letter of verification of KTACs signal on the morning of Sept. 1st. Your notes on our programming agrees with our log. Was happy to hear that we made it through the interference in your area.

You asked about our radiation pattern. At the time you were listening and at this time of the year we operate non-directional with 1,000 watts. After sundown we switch to a three tower directional system ,also with 1,000 watts. Our null or low signal strength area is toward KOA.

May I wish you continued success and enjoyment with your DXing and thank you for your interest.

Sincerely,

Bill Luckhurst

Chief Engr.
