Mr. John Sampson
20088 Las Ondas Ct.
Cupertino, California 95014

Dear John:

Thanks for your excellent log of KWTC on Wednesday, August 2nd. This checks with our log for that date.

The "Fun Boy" is actually the "Bun Boy" Restaurant. They have two, one in Barstow and the other in Baker on the way to Las Vegas.

We use a Hammarlund HQ-129-X ourselves for Emergency Broadcast communication reception of signals from other stations in event all telephone lines are out. They are an excellent receiver.

A loop antenna would be your only possible chance of picking up KWTC, as we are one of more than 160 radio stations on 1230 kc. We use a 1 kw Collins 20 V-3 Transmitter and quarter wave monopole antenna. At that time of night we were cut back to 250 watts, which we have to do at local sunset.

Thanks for thinking of us.

Best personal regards,

RADIO STATION KWTC

W. T. BROWN, General Manager
