

WATI

"Your State University On The Air"

State University
Agricultural and Technical Institute

BOX 640

FARMINGDALE, N. Y.

March 4, 1964

Mr. John Sampson
23 Terrence Ter.
Freehold, New Jersey

Mr. Sampson,

This is to confirm your reported reception of WATI on February 23, 1964 from 2:26 PM to 2:45 PM E.S.T.

The entire station, including the transmitter, was built by students. We put about thirty watts into the final stage but have no idea on how much we radiate. Our antenna is a horizontal long-wire, approximately 200 feet long in a west-north-west direction. This antenna radiates from the side, both south-south-west and north-north-east.

Thank you for your interest,

Jay Powell
Station Manager
Chief Engineer
