January 22, 1963

Mr. John Sampson
23 Terrence Ter.
Freehold, New Jersey

Dear Mr. Sampson:

This will verify your reception report of WCGR on January 14, 1963 between the hours of 4:00 and 4:17 $\frac{1}{2}$ A.M. E.S.T.

WCGR operates on an assigned frequency of 1550 kilocycles with a power output of 250 watts from sunrise to sunset from a non-directional antenna.

Our transmitter, located two miles southeast of the main business area, is remote controlled from our studios at 41 South Main Street.

It is interesting to us to hear from you DX'ers so we have an idea of how far our signal travels. Consequently, it was a pleasure to have been able to conduct the test on January 14th.

Sincerely,

CANANDAIGUA BROADCASTING
COMPANY, INC.
