23 Terrence Terrace

Freehold N.J.

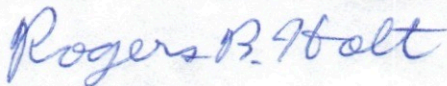

Dear Sir:

I am pleased to verify your reception of WCNX on the 14th of July 1963 from 8:59 A.M. to 9:06 A.M. after checking our program logs.

Our antenna is a 205 ft shunt fed Guided tower. As we have only one tower the primary signal is 25 miles in any direction. We have a sales area, no real competition, about 15 miles from here in all directions.

Thank you for your report of reception of WCNZ and your interest in Radio Broadcasting in general.

Very truly yours

Rogers B. Holt
Chief Engineer
