W E A C

1500 KC
1000 WATTS

November 24, 1962

Mr. John Sampson
23 Terrence Ter.
Freehold, N. J.

Dear John;

Thank you for your report of November 17, 1962...This letter will serve as verification that you did receive our signal. The announcer was Bill Sumner rather than Turner, but after checking logs etc, you most definitely heard W E A C on 1500 KC. We are a kilowatt except during critial hours, then we cut to 250 Watts, which you heard.

The antenna is 165 feet tall on average terrain, using an L type tuning unit. The transmitter is the Gates kilowatt, using 807's and 833-A's (the best we think, had sad experience with 4-400's). All audio equipment is Gates also except a few tape machines and mikes.

Our air date was September 29, 1962....and you are the first dx'er to ask for a verification.

You may hear our other station, W A G Y in Forest City, N. C. It's a kilowatt on 1320 KC. We sign of at 5:00 AM each morning except Sunday. I am also a ham W4TMT, Mostly on 75 meters phone, with some 10 meter work.

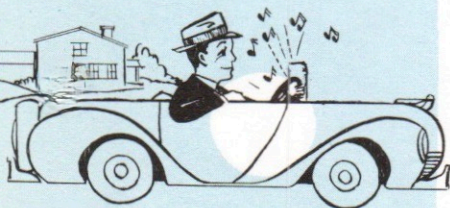

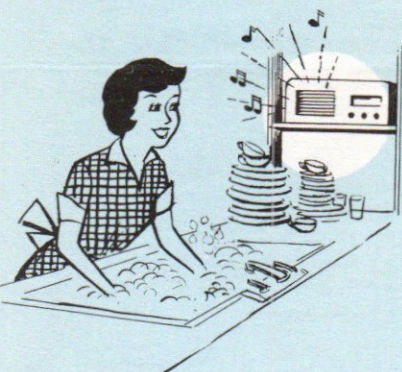

Thanks again:

Cordially,

Radio Station W E A C
