Radio and Television Centre

70 HENRY STREET

RADIO 680 KC
TWX BN-80

BINGHAMTON, N. Y.
TELEPHONE 3-8251

October 28, 1963

Dear Listener:

This will verify your ^{*}reception of WINR Radio, which operates on a signed frequency of 680 kilocycles utilizing two 400' and one 506' towers with an input of 1000 watts day and 500 watts night.

The transmitter is a Collins 20-V, backed up by an emergency RCA 250 watt standby transmitter.

We appreciate your interest in sending us your signal report.

Sincerely,

WINR Radio & Television

Gino Ricciardelli
Technical Director
