October 14, 1963

ALFREDO RAMIREZ DE ARELLANO
President

Mr. John Sampson
23 Terrence Terr.
Freehold, N. J.

Dear John;

This is to QSL your reception report of reception of our WKYN transmitter on October 1, 1963.

This is the second reception report from New Jersey of reception on October first. The other report also mentioned reception at about the same time on the day before.

At the time you mentioned our WKYN transmitter is operating with a directional pattern to protect CMQ in Havana. (I believe that it's CMQ)

WKYN has a two tower array on a high point of ground just outside of San Juan. It operates as a part of the "Quality Radio Network" which is Puerto Rico's only island-wide English broadcasting service.

Thanks for all the information and "good reception" to you.

Sincerely yours,

Robert Bennett

Program Director
