Mr. John.

Thank you for your fine report,
and here is that qsl from
your old stomping grounds, hi!
We are highly directional with
our main lobe toward Hyannis
or a 130 degree radial from
here. So it probably would
not take much qrm to drown us
out down in NJ. Believe most
of the qrm came from WEAM -
judging by the reports. Stop
in next time you are around!
Merry Xmas & Happy DX-full
New Year. 73s

Klaus Kaubola
