Mr. John Sampson
23 Terrence Ter.
Freehold, New Jersey

Dear Mr. Sampson:

Your reception of WRIV's broadcast on September 21, 1963 as detailed in your letter of September 24, 1963 is hereby confirmed as accurate.

I notice that you received our signal predominantly over water. On land our .5mv/m contour falls near Moriches, Long Island but after it gets on water there is a large extension of this contour. At the present we do not have coverage maps available.

Many thanks for your interest.

Sincerely,

John E. Broome
Engineer
