Dear Mr. Sampson,

Thank you for your recent note in which you state that you were able to hear WVIP on March 24, 1963.

This is to confirm your report of the reception.

WVIP operates on 1310kc with 5,000 watts, daytime only. We have a two tower directional pattern with the main beam at 55° north true.

Thank you again for writing us. We appreciate your report and your interest. We will keep your report in our files.

Sincerely,

Ken MacBride
Chief Engineer
