January 14, 2003

John N. Sampson  
35316 North Moose Point Road  
Grand Rapids, MN 55744

Dear John:

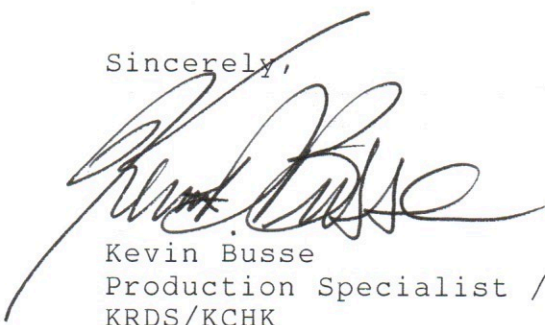

Checking over your reception report of 1350-am KCHK, and matching it with our program log, we are pleased to confirm your report dated May 22, 2002 from 7:58pm to 8:05pm.

Sorry it took so long to get back to you, but the station has a new owner, and it's possible that your original report got lost in the transfer and the chaos that new management can create during the switch.

Being a DX'er myself (mostly on the shortwave bands), I find it interesting that KCHK was audible in Grand Rapids during that time, however briefly. KRNT in Des Moines usually begins to cover our signal (outside of our main listening area) around sunset, and what makes it even more surprising is that KCHK beams south! 1350-am KCHK is 500-watts during the day, dropping to 75-watts at sunset.

I am enclosing some general information about KCHK 1350-am, and KRDS 95.5-fm (formerly KCHK-fm), a coverage map of our AM signal, and a station profile. I hope you find the information helpful in your DX'ing hobby.

Sincerely,

  
Kevin Busse  
Production Specialist / Air-Talent
