

KMNS; Sioux City, Iowa; 620 kHz:

163'

KG95 KMNS Z-98 KSFT KWSL

Dear Mr. Sampson,

Please consider this letter as verification of your reception report of KMNS on May 20, 2003.

KMNS is a full time directional station with separate day and night patterns. We operate at 1,000 watts and use a BE-AM1A as our main transmitter with a Collins 820D2 as our auxiliary.

Our directional patterns are derived through the use of two 305 foot and two 405 foot towers in Dakota County Nebraska.

Thanks for letting us know you heard us and continued successful DX'ing.

Sincerely,

Steve George
Chief Engineer
