Mr. John Sampson
35316 N. Moose Point Rd.
Grand Rapids, Minnesota 55744

Dear Mr. Sampson,

It is my pleasure to inform you that you did indeed hear 690 AM broadcasting from St. Louis Missouri at your location north of Minneapolis on Monday September 26, 2016. Your report is consistent with the programming that we would be running at that time. Congratulations on your reception!

KSTL is a non-directional AM station licensed to St. Louis Missouri and operates at 1kW daytime and 15 watts at night. Our tower is located directly across the river from the Gateway Arch in Illinois in the city of East St. Louis. It is a 350 foot tower and is shunt fed and is grounded at the base. We use a solid state Nautel transmitter.

KSTL does not have a full time radio engineer. I am the designated chief operator and I keep the station on the air and working properly as a part time contract broadcast engineer.

Thank you for sending your report.

Sincerely,

Daryl McQuinn
