Re: Reception Verification

8/25/98

John:

This letter should serve to verify your reception of KYMN radio on August 22, 1998 between 8:33 and 8:48 PM. KYMN operates with 1000 watts, non-directional, during the daytime with 33 watts Post/Pre Sunset authorization. At the time of your monitoring, we were operating at our daytime facilities due to the storms which were in the area. By the way, the Weather Center was manned by Bob Matheson, not Bob Madison. An honest mistake given the signal conditions. Bob Matheson is the Operations Manager and our resident weather specialist.

KYMN has operated since 1968 and is one of the very few remaining locally owned/locally operated radio stations in the state, especially in the general Twin Cities metro.

Thanks so much for your report. I, too was (and to some extend still am) an avid DXer. At my peak I had several hundred cards and letters from distant stations. Most of those were destroyed several years ago in a house fire. It is nice to be able to send one out to someone else. KYMN is also on the web and has email. Our Web address is <http://www.kymn.com> and our main email is [kymn@kymn.com](mailto:kymn@kymn.com).

I am enclosing our coverage map for your information...

Feel free to write anytime.

William Pfeiffer

Program Director

KYMN Radio
