NATIONAL FOREST

Deer River Ranger District, Box 308, Deer River, MN 56636

Phone: (218) 246-2123

October 26, 1998

Mr. Sampson,

This will confirm your reception of the Chippewa National Forest's Information Station on 1610 kHz on July 22, 1998.

Each week, on Thursday a.m., I change the information broadcast. The range for the information station is approximately 4 miles in a circular pattern near the Cutfoot Sioux Visitor Information Station.

We only transmit information about the Chippewa National Forest, Visitor Center, environmental education programs and public information specific to that location on the Forest, State on Minnesota. We have no receiver.

I have taken the liberty to copy your original letter and have indicated the corrected information on that copy. I hope this will be of some value/interest to you.

I enjoyed hearing from you that you could actually receive this message so far away. If I can be of further assistance, please let me know. Please stop by and check out the Chippewa National Forest and the Cutfoot Visitor Center, the next time you are in our area.
