Mr. Sampson

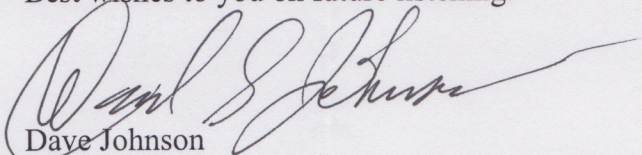

Thank you very much for your signal report on WHK-1420 as you heard the station on November 12, 2008. Your description of our program material was correct when you monitored WHK.

WHK-1420 operates with 5000 watts using one 400 ft tower non directional during the daytime and three towers at night with the same 5000 watts. The transmitter is located on a good high elevation in Seven Hills, Ohio, a southern suburb to of Cleveland.

The Transmitter is a 5000 watt solid state Harris Gates 5.

WHK was the first broadcast station on the air in Ohio in the mid 1920's from the same transmitter site that it operates from now.

Best wishes to you on future listening.

Dave Johnson  
Director of Engineering  
Salem Cleveland Stations
