

WHK-AM-1220-The Word 50,000 watts 24 hrs a day. Cleveland, Ohio

Main Office 4 Summit Park Drive Independence, OH 44131 Phone 216-901-0921

November 7, 2003

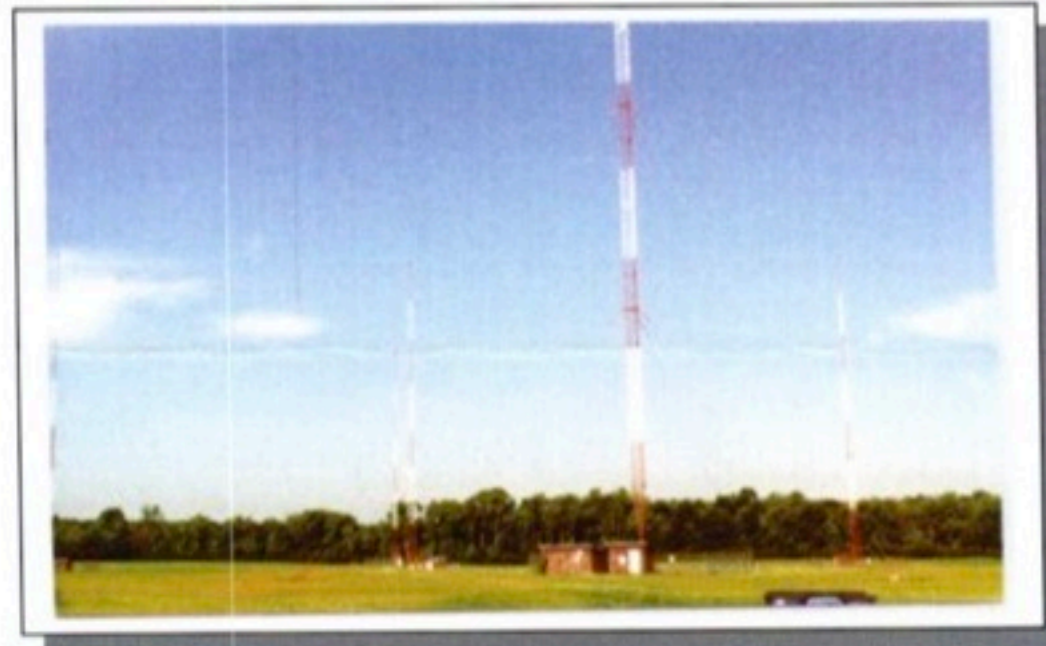

Mr. John N. Sampson
35316 Moose Point Rd
Grand Rapids, Minnesota 55744

Dear Mr. saspson

Thank you for your reception report on WHK-AM. On October 3, 2003. This letter should serve as confirmation of your reception report. Thank you for your detailed program content listing in the report.

WHK operates on 1220 kHz. with 50,000 watts using a five tower directional antenna. The Transmitter is a new Harris 3DX50, Solid State. The antenna site is located in Broadview Hts, a southern suburb of Cleveland. There are five towers in the antenna system. These towers produce a pattern that looks like a dog bone, most of the signal going north and south, the narrow parts of the signal are east and west. For years this transmitter site operated under the call letters of WGAR. It was changed to WKNR, and two years ago it changed to WHK.

WHK is one of five radio stations operated by Salem Communications in the Cleveland Area.

Here is a photo of several of the 5 towers at the WHK antenna site, the towers are 200 ft self support towers. One tower is guyed.
