October 16<sup>th</sup>, 2003

John

This letter shall serve as verification of your reception of 580kc, WKTY La Crosse. WKTY operates at 5kW, directional day, and 780 watts, directional night. The main transmitter is a Rockwell Power-Rock AM transmitter, the 5 towers are near 300 feet tall.

Nice catch, and we're always excited to see where the signal propagates to, the south MSP metro is 'normal', you're pretty north, so band conditions must have been good, aided by your setup, with the Collins radio, and loop.

For fun, I've enclosed some photos of the site during the Flood of 2001, normally that whole area is a grassland, not a lake, a program guide, and coverage map.

Thanks,

Chris O'Hearn,  
Chief Engineer,  
Family Radio Inc.

580	WKTY	(5kW DA5/.78 kW DA5)
1410	WIZM	(5kW ND/5kW DA2)
93.3	WIZM-FM	100kW
94.7	KCLH	6kW (equiv.)
95.7	WRQT	50kW
98.3	KQYB	50kW (equiv.)
