John:

Thank You for your reception report of WQRM, AM 850 on July 29, 2015. Your detailed report is accurate.

It may interest you that WQRM in the very near future will be 50,000 watts daytime, 14,000 watts during critical hours, and maintaining its present PSSA and PSRA power levels.

Your report from 1972 is amazing. I had started at WWJC in 1970 and we were on 1270 KHZ at 5000 watts daytime only. The 1972 report must have been right after we changed to 850 KHZ.

Respectfully:

John Talcott
