

7/31/03

John,

Thanks for your letter, and interest in WTUX 1550 AM. WTUX as you know, operates on 1550KHZ, and is an AM day timer.

We don't get many letters from dx'ers on 1550. Most requests come for 1670, WTDY, which we just put on the air a couple of years ago. It's a 10KW station that has been picked up all over the world.

Please use this letter as confirmation of your reception of 1550, WTUX.

Thank you for your letter.

Roy Simmons/Engineer
Mid-West Management, Inc.
WTUX

P.S.

The 1550 transmitter is a vintage 1950's Collins 21E!
