Apartment 10
Hutchinson, Minnesota

Dear John:

This will confirm your reception of KAYE at 12:59-1/2 am Monday August 14, 1961.

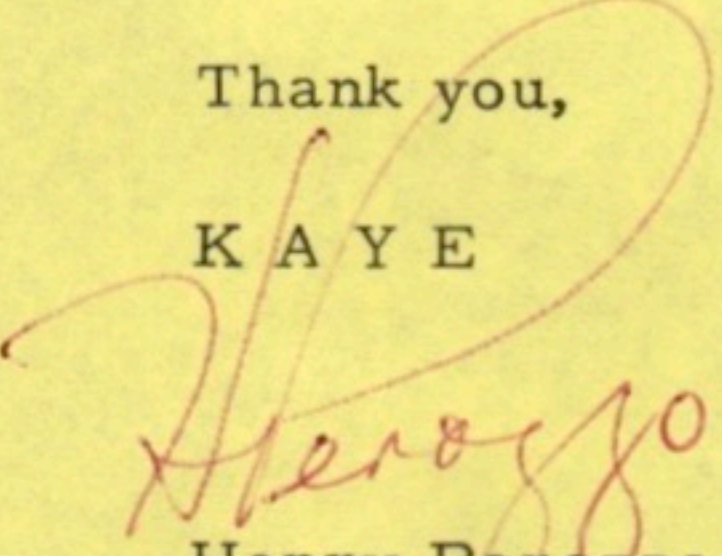

KAYE was operating on night-time power of 250 watts, non-directional, using 150 foot tower.

Our transmitter is a 250-GY model Gates. We also have an RCA BTA-1L which we operate on 1000 watts daytime, and which may be used on 250-watts with some waste of power.

I am enclosing a copy of our Autumn schedule. You will note that we are on the air all night Saturday nights. The operator is Dan Mariot, Box 551, Burien, Washington, and he is also the sponsor of the all-night program. He would appreciate a note (rather than your form letter) if you ever hear him.

Thank you,

K A Y E

Henry Perozzo
