

KJIM Radio

"Music for Adults"

CLEAR CHANNEL 870

November 14, 1960

Mr. John Sampson
570 Prospect
Hutchinson, Minnesota

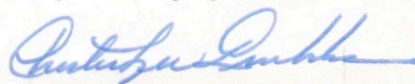

Dear Mr. Sampson:

We wish to express our appreciation for your recent reception report.

K-JIM's combined studio-transmitter facilities are located at the Trinity River in Riverside near downtown Fort Worth. The antenna is a 285 foot tapered, self-supporting, series excited, vertical steel radiator. 180 equally spaced, buried copper radials, 300 feet in length comprise the ground system. Raytheon studio and transmitter components make up the basic equipment structure.

Again, thanks for your reception report and good luck in your DXing program.

Very truly yours,

Chester Lee Grubbs
Assistant Manager
