

Radio Services Company
KLPL

Lake Providence, La.
December 11, 1961

Mr. John Sampson
1065 Jefferson St. So.
Apt. 10
Hutchinson, Minn.

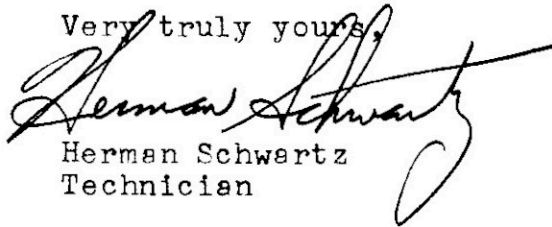

Dear Mr. Sampson:

Thank you very much for the monitor report dated
December 7.

This transmitter is composed of a RCA 250 watt
using 833's in the final. Modulation is with
810's. The quarter wave antenna system is shunt
fed and located some 300 yards from our lake front.
This lake front is some 9 miles long on the north
side of our antenna system. This you can see
gives the radiation pattern a better north to
south pattern. For the power this station, KLPL,
has one of the best coverages in this area.
Our manager, Mr. Gene Underwood, is very pleased to
have your correspondence and I hope this letter
contains all the information you desire.

Again, we appreciate your interest and hope to
hear from you again in the near future.

Very truly yours,

Herman Schwartz
Technician
