

KOTE

1250 KILOCYCLES

NORTHLAND BROADCASTING CORPORATION

BOX 494 FERGUS FALLS, MINN.

REGENT 6-6996

June 29, 1961

John Sampson
1065 Jefferson St. So.
Apt 10
Hutchinson, Minn.

Dear Sir:

A check has been made of your report of reception of this station on June 16, 1961 from 7:35 PM to 7:52 PM, and find that your report of announcements etc, is correct as shown on our program log.

Kote operates daytime with power of 1000 watts, non-directional with 250 foot tower, nighttime with 500 watts directional antenna, kind of a lopsided cloverleaf pattern, with protection towards Pulman Washington, Winnepeg Canada, and toward another station on same frequency in Missouri, directional switching time for Month of June is 9:15 PM CDT.

yours truly

Chief Engineer
