

KYND

Arizona's Most Powerful

Non - Directional Station

600 EAST GILBERT DRIVE, TEMPE, ARIZONA WOODLAND 7-0900

DICK GILBERT
PRESIDENT

ELMA GILBERT
VICE PRESIDENT

November 24, 1960

Mr. John Sampson
570 Prospect
Hutchinson, Minnesota

Kynd Friend John:

It is a pleasure to confirm reception of KYND
by you on November 4, 1960.

We consider this a rather remarkable report,
in view of our distance from Hutchinson, our
daylight condition here at the time you heard
us, and the considerable interference from two
50,000 watt stations on the same frequency:
KDAY and XEDM, plus the interference from KLOU,
and the local weather condition prevailing with
you at that time.

We operate non-directionally (as this letterhead
states) with a 150-foot tower.

At 12:01 A.M. on the second Monday in January we
shall broadcast a special program for National
Radio Club members, and hope you'll be able to
pick us up then with greater clarity--and some
enjoyment!

With every KYND wish to you!

Dick Gilbert
