Dear Sir:

We were very pleased to receive your letter, that you had heard WABF November 5, 1961 from 6:15 a.m. to 6:18 a.m.

As for our equipment and antenna system, we have an RCA-BTA LR transmitter 1 K.W. The antenna consists of two uniform cross-section, guyed, series...excited vertical radiators. Height above insulator 200' (38°). Spacing and orientation, towers are on a line bearing 116° true and spaced 134.5' feet at (60°). Phasing, towers #1. East 0°, #2. West -160°. Ground system, 120 radial 168 to 240 feet long and 120 radial 50' long evenly spaced around each tower.

If I can supply any more information that you might request, I will be very glad to help you. Thank you for your interest.

Yours very truly,

*Kenneth Brister*Kenneth Brister
