

April 10, 1961

Mr. John Sampson  
Apt. 10  
1065 Jefferson St. South  
Hutchinson, Minnesota

Dear Mr. Sampson:

Thank you very much for your reception report of April 4. We are pleased to advise that your report of our signals during the period 6:14PM to 6:29PM on April 2, 1961 is correct.

We are presently operating non-directional with 250 watts power, a.m. We hope to have our ten kilowatt a.m. plant in operation by the end of September and will operate directional da-1. It will be a broad figure eight pattern with the primary projection to the northeast and secondary projection due west.

Very truly yours,

Radio Station WAUX
