ATwater 8-3561

Mister John Sampson  
1065 Jefferson St.  
Apt. 10  
Hutchinson Minn.

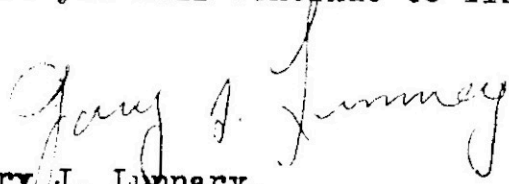

Dear John;

THANK YOU very much for your letter/SWL report of reception, we are very pleased to get reports, and it might interest you to know that yours was the first report we have had from the state of ~~Mich~~ Minn, and we are very pleased, as it naturally is not part of our normal coverage area. We wish to confirm your report as complete and accurate in every detail.

WDEE, is a 1000 watt standard broadcast daytime station, the transmitter is made by Collins Radio Company and has a pair of 4-400's modulated by a pair of 4-400's. we are directional East-West, running two 208 foot towers at a phase angle of 45 degrees.

We hope that from time to time as you tune around on that FB reciever of yours that you will continue to listen to Big "D" radio.

Very best of 73,

Gary J. Lunnary,  
Engineer, WDEE  
(A.R.S. K1KSH/SWL:WPE110)
