Dear Sir:

Your reception report of July 1, 1961 has been checked with our logs and found to be correct. This letter is your verification of reception for that date and time.

WDGY operates with 50,000 watts and a nine tower directional antenna. Our daytime pattern is non-directional, at local sunset, our pattern is changed so that practically all power is beamed to the north.

Thank you for your reception report;

Cordially yours

A. D. DAHL, Supervisor
