

WFHR AND WFHR-FM RADIO STATIONS

Harrison 3-1340 • 210 FIRST AVENUE SOUTH • WISCONSIN RAPIDS, WISCONSIN

October 25, 1960

Mr. John Sampson
570 Prospect
Hutchinson, Minn.

Dear John:

We were very much surprised to hear from you and learn that you had monitored our station while we were on our night-time pattern. Your report of program etc was exactly right.

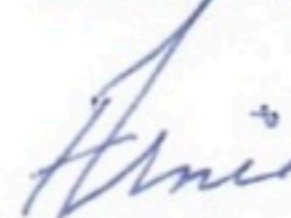

Rather than try to explain our signal pattern, I am sending you a copy of our proposed contours which was drawn up by the engineers.

I stated that I was surprised to hear you had heard us at 10:00 PM. Our daytime pattern is non-directional with a full 5 kw. Night-time is only 500 w and a 3 lobe pattern.

We have Collins equipment at our transmitter and an all new control-studio set-up down town. It is one of the best equipped stations in the area.

Thanks for your interest. If you are ever in this area, stop in and see us.

Sincerely,

Arnie Strobe
Program Director
