Dear DXer:

This letter is to confirm your report of our special DX broadcast Monday morning from four to four thirty for the National Radio Club, February 27, 1961.

The results of this broadcast were surprizing for 500 watts. We were picked up all over the nation and in Canada.

I would like to compliment the club on this work. The sum total of these broadcasts must be interesting.

Sincerely,

Charles B. Ingram
