MAGEE, MISSISSIPPI

Mr. John Sampson
 570 Prospect
 Hutchinson, Minn.

Dear Mr. Sampson,

This is to verify your reception of W.S.J.C., on the morning of November 24, 1960 at 2:20 A.M. I was conducting a frequency test as we do every month on the fourth Thursday morning between 2:15 and 2:30 A.M., CST.

We operate at the present time on 1280 KC's, with 500 Watts of power but around the first of the year we will be switching to 790 KC's with 1000 watts of power, operating off of a directional array of two towers. I am enclosing a coverage map and I hope that you will tuning our way in the near future.

Thanks for writing and letting us know that we are still getting out on the late Frequency Checks once a month.

Sincerely,

Don Diamond,
 Engineer
