Att. Mr Sampson

Thank you for your interest in CKRX. I have checked your report and have verified it to be correct and true.

CKRX has a 10 kw Continental Type 316F transmitter. It is located 15 miles south of Lethbridge, Alberta, where the studios and offices are located. The transmitter feeds a 3 tower directional array, which runs omnidirectional in the day and directional to the north and east at night.

Thank you once again for your interest in 1090 CKRX. Best of luck to you in all of your future DX'ing endeavors.

Kindest Regards,

A handwritten signature in blue ink, appearing to be 'Tyler Everitt', written over a horizontal line.
