

"the new"

May 22, 1996

Mr John Sampson

I received your letter for verification today and you did in fact monitor KDOM in Windom Sunday night, May 19, 1996. KDOM AM is 1,000 watts until sunset. We would not have lowered power until 8:45 pm that evening.

We have received numerous letters such as yours over the past years from Wyoming, Utah, Montana and foreign countries like Norway, Sweden and Denmark. We always tell our listeners and advertisers about our vast audience but claiming those areas may be pushing our sales pitch a bit too far.

Keep Listening!

Rich Biever
Pres/GM
KDOM AM/FM
