

KDWB AM 63
FM 101

MINNEAPOLIS/ST. PAUL

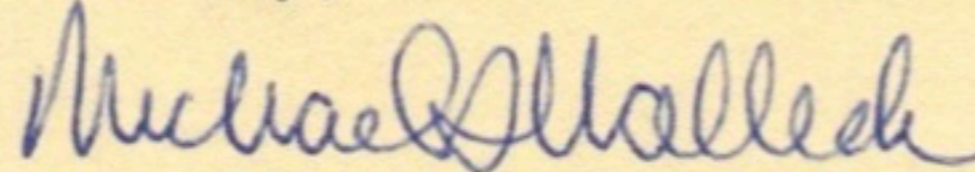

Louis H. Buron, Jr.
General Manager

May 21, 1981

Dear John,

Thanks for your interest in KDWB. Our transmitter during the day is a Collins 820E F1 at 5000W and the transmitter you heard is a Gates BCIG, operating at 500W. We're directional all the time with a six tower array, we change power levels at nite. Once again thanks for the signal report from South Minneapolis.

Sincerely,

Michael D. Halleck
Assistant Chief Engineer
