

KGLD; Golden Valley, Minnesota; 1440 kHz:

**KQRS
92**

45.

February 28, 1984

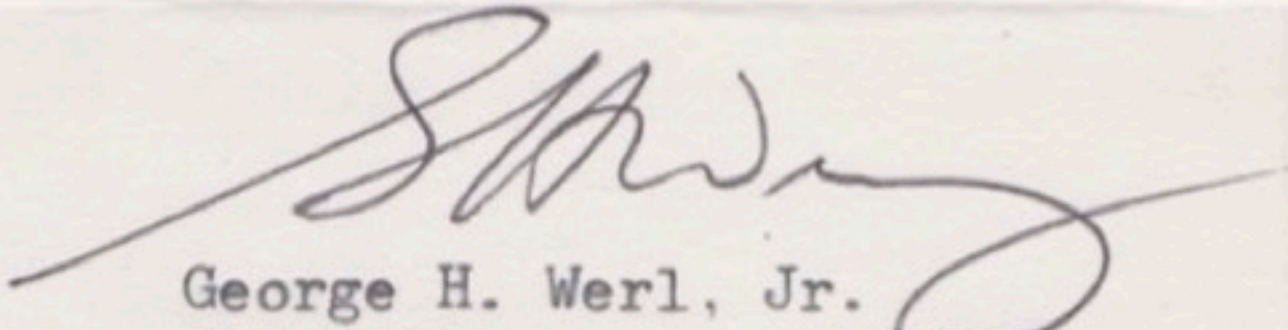

Dear Mr. Sampson:

This will confirm your reception of KGLD referenced in your report of February 9, 1984.

However, considering that KGLD places an interference free city grade contour over your location, I would be very surprised indeed if you had difficulty in reception on any receiver, even the most inexpensive.

Frankly, I am far more interested in responding to more legitimate DX requests, and have, to listeners in Germany, England and Australia, to name but a few.

This response appears on "KQRS-92" letterhead as KGLD does not have separate letterhead.

George H. Werl, Jr.
Chief Engineer, KQRS/KGLD
