

11-13-95

Dear DX'er:

Thank You for your reception report. The details of your report are consistent with the KHEY program log for the dates and times you have specified.

KHEY operates on 690 Khz with 10,000 watts power and a directional antenna with different day and night patterns. (DA-2) The transmitter site is located approximately 20 miles NNE of Downtown El Paso at 13000 Dyer Street on 50 acres of desert property on the northernmost edge of the city. The antenna array consists of four vertical radiators each 350' tall and arranged in a rectangle configuration with a north/south spacing of 100 degrees and an east/west spacing of 190 degrees. All four towers are in operation both day and night. The transmitter is a Bauer FB-10J. The site was constructed in 1969. The studios are located at 2419 North Piedras Street.

Thank You for you report!

Best Wishes,

Patrick Parks
Chief Engineer
