November 14, 1995

Mr. John N. Sampson
4949 Aldrich Avenue South
Minneapolis, MN 55409

Dear Mr. Sampson:

Thank you for your reception report of KPBC of November 3, 1995. Based upon the information you provided, I can confirm that the station you heard was, in fact, KPBC.

KPBC operates with 10 kW-day and 1 kW-night using a five-tower directional array located just northeast of Dallas. The day pattern has a broad main lobe to the west-southwest with nulls protecting stations in Stillwater, OK, Texarkana, TX and Lafayette, LA. At night, the main lobe is to the southwest with nulls toward the west (KKOB - Albuquerque) and the northeast (WABC - New York). Both main and auxiliary transmitters are all solid-state digital units manufactured by Nautel of Canada. KPBC broadcasts in high-fidelity C-Quam® stereo. Studios are located in Irving, TX across the street from Texas Stadium, home of the Dallas Cowboys.

Again, thank you for your reception report and interest.

Sincerely,
CRAWFORD BROADCASTING COMPANY

W.C. "Cris" Alexander
