

14. MAY/82

Dear John,

Yep, sounds like you did receive us on Sunday nite.

We run 5kw day and 1kw nite, just two years ago we erected the third tower and powered up. Our day pattern is directed virtually all north, and nite is NW towards Grand Forks/E.G.F.

Very unusual to hear from the cities, considering where most reception reports we receive are from Scandinavia.

Thank again and best DX.

A handwritten signature in black ink, appearing to read "Bob Linn".
